Hi·Lowtm

Exclusive Pocketed Innerspring System from Leggett & Platt.

The **Active Support Technology™** of innersprings allow your muscles to relax in a more natural sleep position.

The coils adjust instantly to your sleep movements, comforting and supporting your body actively.

This unique pocketed innerspring manufacturing process is only available from Leggett & Platt. Utilising specially automated technology that strategically positions coils of varying heights in the same row, maximising product comfort, support and versatility.

Hi-Low can be configured in numerous ways offering incredible design flexibility and exclusivity potential. The process can also be combined with many standard or proprietary pocketed innerspring systems, enhancing an established product range or developing new marketing possibilities!

Opportunities include

- *Conventional Zoning*
- *Chequerboard*
- *Cavity Filled*

All available single or doubled sided, in varying heights and unit sizes.

This exclusive process has been made possible by the development of protected pocket machine technology by Leggett & Platt.
