

mira-coil

Since its introduction, **Mira-Coil™** has been acclaimed the most innovative sleeping surface development in the world. Utilizing advanced wire-forming technology, Mira-Coil has earned its reputation within the bedding industry as a premier innerspring of quality.

Mira-Coil is made up of continuous strands of specially formed wire. This “pioneering innerspring system” provides the optimum in surface comfort, weight distribution, body conformity and essential support.

Produced only by Leggett & Platt, Mira-Coil and the equipment required to manufacture it are protected patents.

This continuous spring technology is offered exclusively by L&P.

A variety of specifications and size options are available.

Characteristics, features and benefits include:

- Continuous innerspring system
- Reduced partner disturbance
- 100% sleeping surface
- Premium product
- Protected technology
